Chris Howlett : Boeing B-29 Superfortress Manual 1942-60 (all marks): An insight into the design, operation, maintenance and restoration of the USA's giant long-range heavy bomber (Owners' Workshop Manual) before purchasing it in order to gage whether or not it would be worth my time, and all praised Boeing B-29 Superfortress Manual 1942-60 (all marks): An insight into the design, operation, maintenance and restoration of the USA's giant long-range heavy bomber (Owners' Workshop Manual):

6 of 6 people found the following review helpful. This book is a great addition to any WWII aircraft collectionBy B.

C. Barris This book is a great addition to any WWII aircraft collection. Chris Howlett (not Simon as identified by) is a well respected researcher on the B-29, or Washington - as it was known in service with the RAF. His latest work covers the Superfortress from the early development, through its wartime service (WWII, Korea, and the early Cold War), all the way until it was retired from USAF and RAF service. Every page has both relevant data and illustrations to tell the B-29 story. Chris includes information he has gathered from hundreds of former aircrew who flew the B-29 and the men who kept them flying. I highly recommend this book. 1 of 1 people found the following review helpful.

Nice Book For Aviation History (But not really a shop manual) By Dave B. Not really a manual, but more of a history with some excellent photo's and diagrams. Its pretty interesting with some technical info such as lubrication requirements for various systems. I bought it for my son who is an AP mechanic and saw "Fifi" the Commemorative Air Force's B-29 fly into an airport he was working at a couple of years ago, and he has talked about it ever since. I like to see the younger generation learn to appreciate aviation history from an earlier age, and I thought he could use this book to start his own historical aircraft library. 1 of 1 people found the following review helpful. Just the right amount of detail and back stories

By BigGreenWow, this book is a great read!! It has some awesome photos, great back stories and a good mix of maintence/flight instructions.

The Boeing B-29 Superfortress has carved its name in history as the bomber aircraft that dropped the world's first ever H-bombs on the Japanese cities of Hiroshima and Nagasaki in August 1945. Flown mainly by the USAAF towards the end of WW2 and later during the Korean War, the four-engine B-29 was at the cutting edge of aeronautical design for its time, with pressurised crew accommodation, electronic fire-control system and remotely operated gun turrets.
