Thomas Hippler : Bombing the People: Giulio Douhet and the Foundations of Air-Power Strategy, 1884-1939 (Cambridge Military Histories) before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Bombing the People: Giulio Douhet and the Foundations of Air-Power Strategy, 1884-1939* (Cambridge

Military Histories):

Charts how Giulio Douhet's pioneering strategy of targeting civilian populations with air power developed from 1884 to World War II.

"Bombing the People presents a convincing argument as to why the development of Italian air power and its doctrines remain fundamental in military aviation today. Anyone with an interest in air power should find it a satisfying read." Aviation History "Detailed and thorough." History Today "The ideas presented on this subject are well worth further examination, as is the book overall." Thomas Keaney, H-Net "Thomas Hippler's book examines Douhet's output in considerable detail. He also quotes from many other (mainly Italian) writers, drawing on the 500+ documents listed in the bibliography. It is a book that needed to be written and his considerable research results in a very comprehensive analysis of Douhet's work, its supporters and its critics." AerospaceAbout the Author Thomas Hippler is Associate Professor at Sciences Po Lyon, University of Lyon. His previous publications include *Citizens, Soldiers and National Armies: Military Service in France and Germany* (2007).
