Bernard D. Rostker, Charles Nemfakos, Henry A. Leonard, Elliot Axelband, Abby Doll, Kimberly N. Hale, Brian McInnis, Richard Mesic, Daniel Tremblay, Roland J. Yardley, Stephanie Young : Building Toward an Unmanned Aircraft System Training Strategy before purchasing it in order to gage whether or not it would be worth my time, and all praised Building Toward an Unmanned Aircraft System Training Strategy:

The swift adoption of unmanned aircraft systems (UASs) and their increasing use in the field have exceeded the capacity of the training infrastructure to sustain training on these systems over the long term. This report develops a general concept for training military forces in employment of UASs and a framework for addressing the training

requirements and discusses the limits of existing infrastructure in supporting UAS training.
