**Dr J F Borsarello : Camouflage Uniforms of Asian and Middle Eastern Armies (Schiffer Military History Book)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Camouflage Uniforms of Asian and Middle Eastern Armies (Schiffer Military History Book):

Good photos, not great photos and this book is a little dated however there is not anything to replace it. It covers Asia very well, the coverage of the middle east is olny good. One annoying features is that some photos of the uniforms are of manikins wearing the uniforms. The manikins are all whites, which are not depicting the correct ethnic group, this gives museum quality to the photos. It does not show how the uniforms would be worn in the field, it is not a field referance work. However all in all you can't buy a

better book well worth the \$, because there is nothing else even close.

This book is the second in a series that show the camouflaged uniforms of the armies of the world. This volume covers the armies of forty countries of the Middle East and Asia. Where the previous volume on European and NATO armies only covered camouflage uniforms, this volume has added rank insignia and other badges making the book more complete. For the first time, the reader will have a full overview of the different military garments used by these countries. Many of these armies are engaged in conflicts around the globe. If not in United Nations peacekeeping operations, it is in the war against terrorism - in the Middle East, Korea, or Indonesia. In all of these conflict zones camouflage plays an important role and all of them are shown here in color.
