**From imusti : Civil War Wests: Testing the Limits of the United States** before purchasing it in order to gage whether or not it would be worth my time, and all praised Civil War Wests: Testing the Limits of the United States:

This innovative study presents a new, integrated view of the Civil War and Reconstruction and the history of the western United States. Award-winning historians such as Steven Hahn, Martha Sandweiss, William Deverell, Virginia Scharff, and Stephen Kantrowitz offer original essays on lives, choices, and legacies in the American West, discussing

the consequences for American Indian nations, the link between Reconstruction and suffrage movements, and cross-border interactions with Canada and Mexico. In the West, Civil War battlefields and Civil War politics engaged a wide range of ethnic and racial distinctions, raising questions that would arise only later in places farther east. Histories of Reconstruction in the South ignore the connections to previous occupation efforts and citizenship debates in the West. The stories contained in this volume complicate our understanding of the paths from slavery to freedom for white as well as non-white Americans. By placing the histories of the American West and the Civil War and Reconstruction period within one sustained conversation, this volume expands the limits of both by emphasizing how struggles over land, labor, sovereignty, and citizenship shaped the U.S. nation-state in this tumultuous era. This volume highlights significant moments and common concerns of this continuous conflict, as it stretched across the continent and throughout the nineteenth century. Publishing on the 150th anniversary of the end of the Civil War, this collection brings eminent historians into conversation, looking at the Civil War from several Western perspectives, and delivers a refreshingly disorienting view intended for scholars, general readers, and students.
