**From Brand: G.P. Putnam : Combat aircraft of the world;** before purchasing it in order to gage whether or not it would be worth my time, and all praised Combat aircraft of the world;:

0 of 0 people found the following review helpful. Great directory of combat planesBy Benjamin KrystallI'm very happy with the book as it describes every major combat airplane and a few helicopters in the directory and also has 3-view drawings and technical specifications. Out of print books are awesome and hard to find these days at a very good price.0 of 0 people found the following review helpful. Five StarsBy Edward A Grimsleyjust what I wanted0 of 0 people found the following review helpful. Complete catalog of every military airplane to 1960sBy Bruce E. MccallThis book is a complete catalog of every military airplane up to the 1960s. The book is organized by nation and then alphabetically by manufacture. Each plane will typically have about a page with a brief text history, some small bw photos and sometimes some line drawings showing front, side and top views. The book also has a good indexI like this book for it's complete listing, but I'm actually more comfortable using the Rand McNally aircraft series which gives a much better history.This book does not list airships. Readers interested in airships should get "Jane's Pocket Book of Airships" by Lord Ventry, c. 1976.
