Rear Adm. J. C. USN Wylie : Military Strategy: A General Theory of Power Control (Classics of Sea Power) before purchasing it in order to gage whether or not it would be worth my time, and all praised Military Strategy: A General Theory of Power Control (Classics of Sea Power):

Because of his long experience with the formulation of military strategy in the United States, Admiral Wylie's analyses and opinions are well worth the attention of military professionals, government leaders, newspaper editors, commentators and scholars. Because he has a freewheeling mind and is unhampered by orthodox military terms and the prevailing dogmas, his book will be of keen interest to laymen concerned about our nation's welfare and future.

"No military service can long remain effective without searching self-criticism and continuous re-examination of its own ideas. Wylie is a refreshingly outspoken individual, thoroughly at home on the bridge of a ship, but equally at home in the semantics of dialectical discussion. He has produced a simple but relevant little work in an attempt to promote order in the discussion of strategy. . . . To the traditional theories of strategy—the maritime theory, the air theory, the continental theory—Wylie adds the 'Mao theory' of wars of national liberation. . . . [This book is] easier to read and understand and basically sounder than the great majority of the involved and tortuous rationalizations of the academic strategists." —New York Times Book Review

Now available in paperback, Admiral Wylie's analyses and opinions have long been of interest to military professionals, government leaders, journalists, commentators, and scholars. Noted for a freewheeling mind unhampered by orthodox military terms and the prevailing dogmas, this book on strategy has been valued for its astute and clearly stated arguments.

About the Author
Rear Admiral Joseph Caldwell Wylie, Jr., USN was born March 3, 1911 and died on January 29, 1993 in Portsmouth, Rhode Island.
