Peter Alden, Fred Heath : National Audubon Society Field Guide to California before purchasing it in order to gauge whether or not it would be worth my time, and all praised National Audubon Society Field Guide to California:

2 of 2 people found the following review helpful. Highly Recommend for CaliforniaBy catwranglerI wanted a field guide that had all the animals and plants in them just for California. I keep this in my car and have found great use of it to identifying different lizards, birds and was so happy I saw a Bobcat. Book was in good condition with an unbroken spine.0 of 0 people found the following review helpful. Perfect California Natural History GuideBy CustomerI hike a lot in northern California. This is the perfect guide to identify birds, flowers, insects and animals that are specific to California.0 of 0 people found the following review helpful. Great/Useful bookBy Compulsive ShopperGood book. Some very minor details are a bit off, but it's not enough to devalue it.

The most comprehensive field guide available to the flora and fauna of California--a portable, essential companion for visitors and residents alike--from the go-to reference source for over 18 million nature lovers.This compact volume contains:An easy-to-use field guide for identifying 1,000 of the state's wildflowers, trees, mushrooms, mosses, fishes, amphibians, reptiles, birds, butterflies, mammals, and much more;A complete overview of California's natural history, covering geology, wildlife habitats, ecology, fossils, rocks and minerals, clouds and weather patterns and night sky;An extensive sampling of the area's best parks, preserves, beaches, forests, islands, and wildlife sanctuaries, with detailed descriptions and visitor information for 50 sites and notes on dozens of others.The guide is packed with visual information -- the 1,500 full-color images include more than 1,300 photographs, 14 maps, and 16 night-sky charts, as well as 150 drawings explaining everything from geological processes to the basic features of different plants and animals.

.com California natives and visitors alike will appreciate this compact, photo-filled overview of the Golden State's natural history. Along with a summary of geography, geology, weather, and wildlife, there is a field guide to the identification of 1,000 of the state's unique inhabitants, including the smallest butterfly in the world (the Western Pygmy Blue), the largest animal (the Blue Whale), and one of the largest living single organisms (the Giant Sequoia). What's more, some of the best places to see this diversity of flora and fauna--the many parks, preserves, beaches, forests, islands, and wildlife sanctuaries--are listed with detailed information. To flip through the guide's pages is to envision endless possibilities for scenic and educational field trips, from fog-shrouded Point Reyes National Seashore to the barren salt pan of Death Valley National Park.From the Inside FlapFilled with concise descriptions and stunning photographs, the National Audubon Society Field Guide to California belongs in the home of every California resident and in the suitcase or backpack of every visitor. This compact volume contains: An easy-to-use field guide for identifying 1,000 of the state's wildflowers, trees, mushrooms, mosses, fishes, amphibians, reptiles, birds, butterflies, mammals, and much more; A complete overview of California's natural history, covering geology, wildlife habitats, ecology, fossils, rocks and minerals, clouds and weather patterns and night sky; An extensive sampling of the area's best parks, preserves, beaches, forests, islands, and wildlife sanctuaries, with detailed descriptions and visitor information for 50 sites and notes on dozens of others. The guide is packed with visual information -- the 1,500 full-color images include more than 1,300 photographs, 14 maps, and 16 night-sky charts, as well as 150 drawings explaining everything from geological processes to the basic features of different plants and animals. For everyone who lives or spends time in California, there can be no finer guide to the area's natural surroundings than the National Audubon Society Field Guide to California.About the AuthorPeter Alden, principal author of this series, is a birder, naturalist, author, and lecturer. He has led nature tours to more than 100 countries and is the author of books on North American, Latin American, and African wildlife. Peter organized an event called Biodiversity Day, the first of which took place in his hometown of Concord, Massachusetts.Fred Heath, author of several sections of this guide, as well as regional consultant, is a naturalist, field trip leader, and lecturer, who is active in the Los Angeles chapter of the National Audubon Society and the North American Butterfly Association.
