This is an amazing piece of history about a neglected part of the ...By ASPMy father was in a night fighter squadron flying a jet (Vampire NF34) of the same vintage as the F3D here. This is an amazing piece of history about a neglected part of the Korean Air War. Learned a lot I didn't know before.0 of 0 people found the following review helpful. great story, brings back memories of the "whale "By Joseph Balabongreat story ,brings back memories of the "whale "1 of 1 people found the following review helpful. I was disappointedBy BillWI was disappointed in this book. The title lead me to expect that it would contain material about flying and fighting at night over Korea. There is lots about the design of the Skynight, about training, about fellow Navy and Marine fliers, about life on a Korean fighter base and about administrative misuse of the new fighter. The book has tales about the PX, about latrines, and about what footwear works in the Korean mud. Some of the stories are quite funny. Unfortunately there is very little about what it was like for the author to fly at night over Korea and only a few pages are devoted to one brief encounter with enemy MiGs. It was not what I expected. A poor sandwich: all bread and almost no meat.

The Korean War is well known for its daytime battles between the American Sabrejets and Communist MiGs over North Korea, yet few Americans have heard of the wild night skirmishes between the U.S. Navy-Marine Skyknights

and their Chinese and Soviet adversaries. Readers of this story will soon come to realize that in that air war the foe was more often the blackness of night than enemy airmen. The Navy night fighters - jet-powered F3Ds - chronicled here were a detachment of Composite Squadron 4 (VC-4) known as "The Nightcappers". Lt. G. G. O'Rourke led the small team of Skyknights on board the USS Lake Champlain in the Korean War. With no ground attack capability, O'Rourke's intrepid band of frustrated night fighters found themselves unloved, unwanted, and exiled ashore to a forward air base in South Korea. There, they lived and fought with Marine Night Fighter Squadron 513 (VMF[N]-513) and became the U.S. Navy's only jet night fighter squadron to see combat in the war. This landmark contribution describes in detail the development and training of Navy night fighters after World War II, their deployment to Korea, and their nightly encounters with MiGs and monsoon weather. Of particular interest are O'Rourke's rousing descriptions of his own encounters with enemy MiGs where it becomes clear that in his desperate fight for survival, he learned to use the night as his ally.
