**Angus Konstam : Nile River Gunboats 1882–1918 (New Vanguard)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Nile River Gunboats 1882–1918 (New Vanguard):

1 of 1 people found the following review helpful. Gunboats in the attack...By HMS WarspiteA young Winston Churchill's "The River War" helped immortalize the British military thrust up the Nile River into Sudan, there to retake the city of Khartoum from Mahdi rebels. The part played by British gunboats on the Nile campaign has been rather underpublicized. That fault is remedied in this Osprey New Vanguard Series book, "Nile River Gunboats 1882-1918", by Angus Konstam, with illustrations by Peter Dennis. The first British gunboats on the upper Nile were actually improvised by General Gordon during the Siege of Khartoum in 1882. They were underpowered river steamers, outfitted with weapons and wooden timbers for protection. General Kitchener's deliberate campaign into the Sudan in 1896 drew on purpose-built and much more capable vessels. The narrative sets the strategic situation in the

Sudan and spends the bulk of the book describing the gunboats and how they were modified and operated. The concluding chapters cover their actual combat operations. This is a fascinating book, a concise but very interesting look at the gunboats and their multi-national crews. The author provides some nice first person accounts to add detail to the photographs, illustrations, and diagrams which describe the various classes of gunboats. Well done, and highly recommended to students of the conflict and the era of British colonialism in northeast Africa. 2 of 2 people found the following review helpful. Lovely little book By wjc An excellent survey, great illustrations. Despite its small size (which can't be helped with Osprey books and most readers should know what to expect), Konstam goes above and beyond to thoroughly research the topic and write as complete a book as most of us will need. 0 of 0 people found the following review helpful. Five Stars By RAYMOND C. CLAY thank you

For more than 30 years, the Nile river gunboat was an indispensable tool of empire, policing the great river, and acting as floating symbols of British imperial power. They participated in every significant colonial campaign in the region, from the British invasion of Egypt in 1882, to the Battle of Omdurman in 1898, when Britain finally won control of the Sudan. After that, the gunboats helped maintain British control over both Egypt and the Sudan, and played a key role in safeguarding British interests around the headwaters of the Nile--a region hotly contested by several European powers. Featuring specially commissioned artwork, this comprehensive volume offers a detailed analysis of the Nile river gunboats' entire career, from monitoring British colonial interests to defending Egypt against the Ottoman Turks in World War I.

"Illustrated with period photos and drawings and new artwork . . . [Nile River Gunboats] examines the full story of these iconic Empire builders, from the first hastily adapted "penny steamers" to the three classes of purpose-built gunboats that finally conquered the Sudan." - Sea Classics Magazine About the Author Angus Konstam is the author of over 50 books, and several books on piracy, including *The History of Pirates*, and *Blackbeard: America's Most Notorious Pirate*. He worked as the Curator of Weapons at the Tower of London and as the Chief Curator of the Mel Fisher Maritime Museum in Key West, Florida. He lives in Edinburgh. Peter Dennis studied illustration at Liverpool Art College and has since contributed to hundreds of books. A keen wargamer and modelmaker, he lives in Nottinghamshire, UK.
