This is a small booklet, and a quick, simple read. It is a good introduction to Naval operations and I recommend it for new division officers.

A quick read to reinforce some old axioms and ensure routine things get done routinely, with expertise in 5th Fleet and FDNF. If you already know this stuff, good on ya, read it again 2 months in to your tour. Make sure you put Sunset Cigars into the POD because you are OPS and you are awesome.

This book is primarily a practical guide to leading and managing the Operations Department aboard a U.S. Navy warship. It is written for the Operations Officer who leads the department, but is a useful tool for anyone interested in how the Fleet works. To succeed in today's Navy, the Operations Officer must understand the global environment where our Navy operates as well as the organizational context of how Navy missions are defined and assigned. It is a short discount textbook.
