F. N. Maude : The Ulm Campaign 1805: Napoleon and the Defeat of the Austrian Army During the 'War of the Third Coalition' before purchasing it in order to gage whether or not it would be worth my time, and all praised The Ulm Campaign 1805: Napoleon and the Defeat of the Austrian Army During the 'War of the Third Coalition':

4 of 7 people found the following review helpful. A thoughtful analysis
By Simon Bull
Every history book-particularly those of the military campaigns of the past-is a work of analysis. Inevitably the opinion of the author is brought to bear. Whether that opinion is a worthy one is also a matter of opinion. Certainly this author had the credentials for the task. This book is part of a series of three books of Napoleonic campaigns by this author -released by this publisher. It is worthy of note that reviewers on this site of those books regarded them highly enough to award them five stars. Whether one agrees with the perspective adopted by the author is for the reader to decide, but certainly without different perspectives it is impossible to form a balanced unprejudiced opinion. That the author's view may differ from one's own or that of other historians in no way negates it. No one book should be the only one read on any subject. History books of today are no less immune from judgements of the past by applying perspectives of the present than any written 50 or 100 years ago. These perspectives are relevant, interesting and ultimately add to understanding- they do not detract from it. Were that not so time's inevitable passage would make it pointless to write them.

1 of 4 people found the following review helpful. an apologia for general Mack
By Warren Bajan
This 19th century British officer attempts to defend General Mack. His obvious bias against the French shines through. He spends some time defending ancient regime theories of war and draws parallels, or lessons learned, for use of the British forces in the Boer War.

Two of history's greatest commanders clash with the fate of Empires at stake
In the Ulm campaign of 1805, Napoleon demonstrated his mastery of the command of the Grande Armee-some 210,000 men-in a masterful flanking movement which was designed to defeat the Austrian Army under Mack in the Danube region before the intervention of the Russian Army under Kutuzov could affect the outcome. This, the third-and final-book in F.N Maude's trilogy on the campaigns of Napoleon to be published by Leonaur, recounts an aspect of the 'War of the Third Coalition' which is widely considered to be a strategic masterpiece by the French Emperor. The battle of Austerlitz would finalise victory and ensure the defeat of the Austrians, but it would be Ulm which would confirm France as the leading power in Europe. This history, combined with Maude's Jena and Leipzig campaigns-also published by Leonaur-are essential components of every Napoleonic library.
