Mark Henry : The US Army in World War II (3): Northwest Europe: North West Europe Vol 3 (Men-at-Arms) before purchasing it in order to gage whether or not it would be worth my time, and all praised The US Army in World War II (3): Northwest Europe: North West Europe Vol 3 (Men-at-Arms):

0 of 0 people found the following review helpful. Four StarsBy RobertI use it for a painting guide0 of 0 people found the following review helpful. Five StarsBy Michael Freemangood5 of 6 people found the following review helpful. Useful Overview of a Vast SubjectBy El CutacheroThis work is a splendid example of the new emphasis of the publisher on producing comprehensive works in a handy cheap format compared with the earlier broad brush treatments which covered too much in too little detail.The new emphasis is on sets covering various national armed forces in as much detail as is available, consistent with the current purpose of the works in the series, which have

evolved from an original emphasis on serving the military miniature maker market into works intended to enlighten the general reader in enough detail to satisfy the merely curious and to point the way to further reading. Most of us, including myself, have little need for, or the patience to read, voluminous studies, often in foreign languages, covering many eras and nations. My main interest is in the US forces, their allies and their enemies in the twentieth century. That said, these works should be purchased as presented, in sets within the series. Since they are produced as a set, the volumes cover only relevant parts of the general history and the clothing and individual equipment is covered as it appears in each period. The French Army, US Army, British Army, and Italian Army series all have three volumes, covering the major theatres and time periods of the war. The German set has five. See my review of part one for more commentary. If you want an introduction to the fascinating variety of clothing and equipment of the forces covered, this set is for you.

The GIs who struggled ashore through the surf of Omaha and Utah Beaches on 6 June 1944 were members of the best-equipped army ever assembled up to that date. It was in the NW Europe campaign of June 1944-May 1945 that the US Army was finally able to show its full potential for fluent mechanised warfare. This title describes both combat and service uniforms worn in the ETO, from the assault troops on the D-Day beaches to bemedalled veterans celebrating VE-Day; other subjects covered include artillery, tanks, anti-tank weapons, the engineers, the replacement system; and the insignia of the divisions committed to this front. Men-at-Arms 342, 347 and 350 are also available as a single volume special edition as 'The US Army in World War II'.

From the Publisher Packed with specially commissioned artwork, maps and diagrams, the Men-at-Arms series is an unrivalled illustrated reference on the history, organisation, uniforms and equipment of the world's military forces, past and present. About the Author Mark R. Henry is a lifelong student of military history and an experienced re-enactor of many periods. He served in the US Army as a signals officer from 1981-90, in Germany, Texas and Korea. He has previously written Men-at-Arms 327, US Marine Corps in World War I.
