Thomas Newdick : The World's Greatest Military Aircraft: An Illustrated History before purchasing it in order to gauge whether or not it would be worth my time, and all praised The World's Greatest Military Aircraft: An Illustrated History:

0 of 0 people found the following review helpful. Five Stars By alejandro murillo beautiful pictures i love the book
1 of 1 people found the following review helpful. Great, Great Nephew loved it! By Dennis Latona This was a gift for a 13 year old who loves military planes.
2 of 2 people found the following review helpful. ok overview. By RadioMannot a bad overview. worth the money

Ever since man first took to the air, combat aircraft have been at the cutting edge of aviation technology, resulting in

some of the greatest and most complex designs ever built. The World's Greatest Military Aircraft features 52 of the most important military aircraft of the last hundred years. The book includes all the main types, from biplane fighters and carrier aircraft to tactical bombers, transport aircraft, multi role fighters, strategic strike aircraft and stealth bombers. Featured aircraft include: the Fokker Dr.1 triplane, the legendary fighter flown by German flying ace Manfred von Richthofen, 'the Red Baron', during World War I; the Mitsubishi A6M Zero, Japan's highly maneuverable fighter that dominated air-to-air combat in the early part of the Pacific War; the tank-busting Il-2 Shturmovik, the most produced aircraft in World War II; the Harrier jump jet, a vertical takeoff and landing (VTOL) fighter that has been in service for more than 40 years; the B-2 Spirit bomber, an American precision strike aircraft used in recent conflicts in Kosovo, Iraq and Afghanistan; and the F-22 Raptor, an air superiority fighter with state-of-the-art stealth technology that makes it almost invisible to radar. Each entry includes a brief description of the model's development and history, a profile view, key features and specifications. Packed with more than 200 artworks and photographs, The World's Greatest Military Aircraft is a colorful guide for the military aviation enthusiast.

About the Author An aviation and defence writer and editor, Thomas Newdick is based in Germany, from where he has researched and written numerous articles for various specialist magazines and journals examining aviation – both military and civilian, 20th century military history, and defence technology. He is a regular contributor to *Combat Aircraft* and *Aircraft Illustrated* magazines. He is on the editorial staff of both *Guideline Publications* and *Aeroplane*.
